**JOHN POUNDER**

I was born and raised in Northern California, where I started boating at an early age. I attended college in CA and graduated with a degree in Electrical Engineering. After working in the mainframe computer industry, I started my own company, which morphed into a 30 employee company specializing in very high end, home theater systems and custom residential electronics. I sold the company in 2004 and started a marine electronics company in San Diego, while we were preparing our 60' trawler, OuttaHere, to go cruising. I left California to go cruising in 2007 with my wife, Liz. After cruising for 5 great years, we sold the boat and settled in PV, where I have continued to work on marine electronic and electrical systems.
